Summary

I'm a React.js developer who loves making websites that people enjoy using. With 3+ months of hands-on experience in front-end development, I thrive on turning innovative ideas into elegant, responsive, and performant web applications.

My Expertise:

-> React.js Mastery: React is at the core of my development journey. I've honed my skills in building dynamic, interactive, and scalable web applications using React.js, including popular libraries like Material-UI (MUI). Whether it's creating reusable components, optimizing performance, or integrating with RESTful APIs, I'm always up for the challenge.

-> Front-end Technologies: My toolbox includes a deep understanding of HTML5, CSS3, and JavaScript (ES6+), ensuring pixel-perfect and cross-browser compatibility. I stay updated with the latest trends and best practices in front-end development.

-> State Management: I'm proficient in state management solutions like Redux and Context API, ensuring efficient data flow and application-wide consistency.

-> Responsive Design: Crafting web applications that look and perform flawlessly on various devices is my forte. I'm well-versed in responsive design principles and CSS frameworks like Bootstrap.

-> Testing and Debugging: I understand the importance of writing clean, maintainable code.

Experience

React Developer
BVM Infotech
May 2023 - Present (5 months)

Education

Veer Narmad South Gujarat University, Surat
Bachelor of Science - BS, Computer Science
Jun 2020 - Jun 2023
